

# **BOSS Supa-Lite 35**

**THE ultimate 3.5 tonne two horsebox**

**Super Strong**

**Super Light**

**Super Styling**

BETTER BY DESIGN

**BOSS Horseboxes is proud to introduce the All New Supa-Lite 35, built without compromise for practicality and longevity. With its unique styling and superior payload, the Supa-Lite 35 achieves its rugged durability through the use of advanced materials, skilled craftsmanship and excellent design, whilst remaining lightweight. It is truly the ultimate 3.5 tonne two horse horsebox.**

The Supa-Lite 35 features 5 passenger seats, day living and a light and roomy low-stress horse area.

Built on a new or barely used chassis, chosen for their proven reliability and their stability. Your new BOSS box can be driven:

- Up to 70 mph
- On a car licence
- Without a tachograph
- Without VOSA Plating (MOT after 3 years old)
- Economically (approx 30 mpg)

The Supa-Lite 35 body is constructed entirely of super strong but light honeycomb panelling and aluminium which eliminates rot issues (widely used GRP and plywood are prone to rot and can harbour bacteria).

- Special construction methods mean no visible fixings from the outside for a smoother superior finish.
- All windows are powder coated and tinted.
- Top quality paint with two coat lacquered finish.

Web [www.bosshorseboxes.co.uk](http://www.bosshorseboxes.co.uk)

**CAB** – Super reinforced bulkhead. Padded bench seat behind driver carries up to three passengers all with approved seat belts. The seat flips up for under seat storage. (Option of: 1. Extra wide bench to form a bed. 2. Storage area over passenger seat with access from cab). Opening window through to horse area.

**HORSE AREA** – Designed for low stress and the highest levels of comfort and safety. Light and airy with high level lighting and special travel light. Safety breast bar is easily removable with horse in situ. Telescopic padded partition with easy to select multiple positions in attractive coated finish, which does not mark horses coats or rugs. Optional head board. Door from day living has horse friendly curved top edge. Heavy duty window guards, tie and haynet rings. Non slip EVA rubber floor and walls - drain holes easily clear water from washing.

**EASY LOADING** – Low super strong ramp on off side for normal leading is safer and gives confidence to horses. No nasty gaps for little feet or dirt to get into. Side strap gives confidence to horses when ramp is down. Light top door gives airy feel and provides some protection from the elements. All doors are lockable.

**DAY LIVING** – This is a clean seating/changing storage area away from the hay, sneezes and smells of the horse area. Padded seat and large easy access gas strutted rear door with non slip step permanently in situ. Optional sink, cooker and fridge. Umbrella/whip rack

**ELECTRICS** – High level lighting is stylish and makes the box easily seen. All lighting is low energy consumption. Isolator switch cuts out energy consumption when you leave the box to protect battery power. Two way lighting switches (horse area/day living).

**EXTERIOR** – Polished stainless steel tie rings and haynet ring. Up to 3 tack lockers with lights. One large locker on offside adjacent to horse area for easy access to tack and other equipment. Two tack lockers on nearside, one service cupboard with water container and horse shower, plus gas for cooker if required. The other a large area for extra equipment/saddles. Dog tie.

Throughout the Supa-Lite 35 you will find many additional features and attention to detail not found on other boxes, which is a testament to care and quality - the hallmark of BOSS Horseboxes. Built for longevity, your BOSS Horsebox will give many years of excellent service while retaining its good looks and protecting your investment.
